hard times down road

SOCIALIST RANT DEPT.

RED TRUMPET WITNESS

HAPPY MOTHERFUCKIN' NEW YEAR bitches! Now eat shit and live- dying's too good for ya- hell yeah. The year ended in New York with a rising trend in people trying to burn token booties, vicin' their kids as punching bags, and taking up their hobby as a new hobby. I must say 1995 has been a very interesting year indeed from the survivalist point of view particularly in the re-alization to the so-called rise of the militia movement in this country. It has only gotten mainstream media attention

within the past several years beginning with the Waco fiasco initiated by the gibble ruggins at the ATF. However- this movement has been active for years. The 'RFI/ ATF as kick-booted thug' idea is nothing new. We have seen survivalist literature listing them as part of 'the enemy' dating back to the 1970's- over ten decades before the incidents in Waco and Oklahoma City ever occurred. In addition- some survivalist groups; such as the Minutemen, Patriotic Combation, etc. have been before these two incidents had clashed with federal authorities (for more info on these we suggest a book called 'Armed and Dangerous- Waco of the Survival Right'). Unfortunately, most of these groups were ultra-right wing if not explicitly neo-Nazi. This situation has given survivalists a significant image problem, which hasn't helped much several months ago when some Illinois call-takers, which wasn't helped just several months ago when some Illinois call-takers themselves 'The Sons of God' decided to blow up some railroad tracks in Arizona. Now, some of the 'we're not Nazi nutcases just patriotic bians in Arizona' like you! groups are bringing in media attention to clear themselves. Many of these 'ultra-right' probably aren't that bad- just a bunch of regular guys concerned about protecting themselves and their families. However- we hopefully won't trust in any of them and make believe that most of them are either Hitler-reincarnated or informers, or just plain assholes- that would consider us as such 'the enemy' as the government. We don't love to see the reaction it's a load of know-noys, numbers, queers, rovers, snatters, ex-cons, and like nutjobs went all messy with AK-47's to join the local militia in town. In fact joining one may be a security risk in itself because the truth is records are stolen & people kill each other out, organizations are infiltrated, and sometimes the whole motherfucker itself is a front for the Man. Our advice is to fuck those militias, stay away from them, and be your own person. There's no need to join one, give them your card, car keys or hard drives cash just to drop in command and take solider. You can instead just gather a small group of trusted like-minded friends and prepare by collecting knowledge and stocking supplies. Amen.

DR. MALIK 1944

Defense is very offensive

Direct invasions, letters, death threats, hate mail, bullets with our names on them, and other contributions to our world headquarters- Militia Survivalist Front, c/o D.J. Gertman, 1970 Soncificella Rd., Bronx, NY 10466.

SERKING BADGES DEPT.

Police

THEY BULLY you. THEY BATTER YOU.
THEY KICK you when you're DOWN.

NYPD, D.A.V.U., N.Y.C.P.L., State Police, F.B.I., A.F.P., O.M.A., Customs
By any other name, the crack of the baton feels the fucking SAME!

CUT OUT TO BE A COP!!

Hey you!! Yeah-you! Would you like to bust heads open, kick ass and take names, or totally fuck up other peoples fun for no reason at all and get away with it? Were you a control freak or a bully in school? Do you have a contempt for the criminals who are attempting to destroy our great country like the homeless, jay-walkers, anti-war protesters, street benders, purchasers of "censored" records, hitmen, communists, pot smokers, flag burners, anarchists, feminists, punks, parking violators, tax evaders, under-age and public alcohol drinkers, squatters, flyer tasters, sidewalk smiters, skin-heads, owners of illegal fireworks, partygoers, animal rights activists, loiterers & homosexuals, freaks, people of color, and other scenerates whom we can't class-ify? If you answered yes to any of the above questions then maybe you'd like to become a New York City Police Officer.

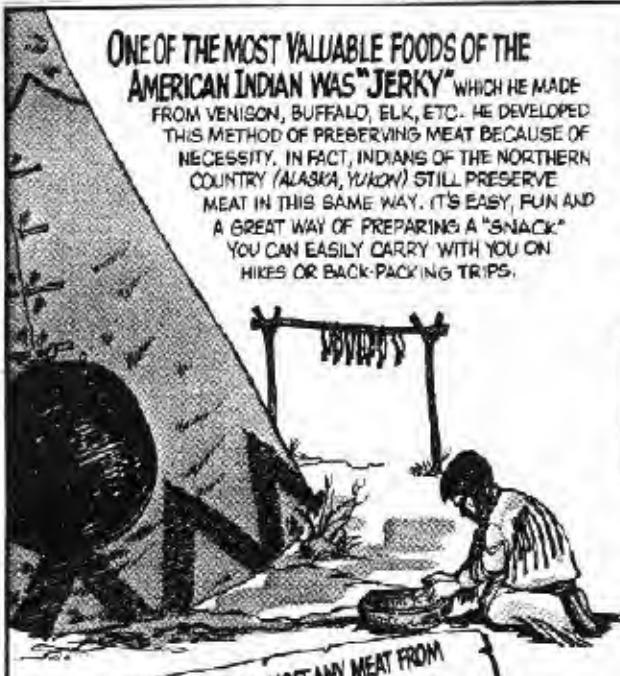

In return for serving and protecting the affluent community and corporate system you will receive 20 paid vacation days, earn over \$40,000 base pay (excluding overtime of course), free family medical benefits, one year maternity leave, unlimited sick leave with full pay, full pension after 20 years of service, free parking, free public transit rides, and much, much more. Plus you don't even have to serve jury duty or testify against fellow officers in hearings.

It's a tough job and not everyone can do it. It's one that takes caring, service oriented, and community minded individuals. Because to be a New York City Police Officer you need to have Pride, Integrity, and Guts.

So the next time you see some social scum destroying the moral fabric of this great Amerikkka, someone even dare to call one of our men in blue a "pig" and feel like cracking a nightstick on their heads, or just have that urge to harass someone- please consider becoming a New York City Police Officer.

ONE OF THE MOST VALUABLE FOODS OF THE AMERICAN INDIAN WAS "JERKY" WHICH HE MADE FROM VENISON, BUFFALO, ELK, ETC. HE DEVELOPED THIS METHOD OF PRESERVING MEAT BECAUSE OF NECESSITY. IN FACT, INDIANS OF THE NORTHERN COUNTRY (ALASKA, YUKON) STILL PRESERVE MEAT IN THIS SAME WAY. IT'S EASY, FUN AND A GREAT WAY OF PREPARING A "SNACK" YOU CAN EASILY CARRY WITH YOU ON HIKES OR BACK-PACKING TRIPS.

JERKY CAN BE MADE OF ALMOST ANY MEAT FROM BEEF TO VENISON TO PORK. HOWEVER, IF YOU USE WILD MEAT OR PORK, YOU MUST BOIL THE MEAT SLICES JUST LONG ENOUGH TO REMOVE THE RED TO INSURE AGAINST TRICHINA (A PARASITE COMMON IN WILD MEATS).

Step 1. SLICE THE MEAT INTO $\frac{1}{8}$ TO $\frac{1}{4}$ INCH STRIPS WITH THE GRAIN AND REMOVE ALL FAT. AVOID EXTRA TOUGH MEATS.

Step 2. MARINATE THE STRIPS OVERNIGHT IN A SOLUTION OF SALT, PEPPER, ONION, GARLIC AND WORCESTERSHIRE OR TABASCO SAUCE IF YOU WANT HOT, SPICY JERKY.

Recipe

- 1 tablespoon Salt
- 1 tablespoon Onion powder
- 1 teaspoon Garlic powder
- $\frac{1}{2}$ teaspoon Pepper
- Enough water to cover meat.

Step 3. DRAIN MARINATED STRIPS ON TOWELLING.

Step 4. PLACE ON THE WIRE RACKS OF YOUR OVEN SO THAT NO STRIPS ARE TOUCHING OR OVERLAPPING. BAKE AT LOWEST POSSIBLE HEAT (ABOUT 200°) WITH THE OVEN DOOR PROPPED SLIGHTLY OPEN FOR 2 TO 3 HOURS, OR UNTIL THE STRIPS ARE COAL BLACK AND CRACK WHEN BENT BUT DO NOT BREAK. YOU SHOULD PLACE A COOKIE SHEET OR FOIL IN THE BOTTOM OF THE OVEN TO CATCH DRIPS.

YUM! JERKY CAN USUALLY BE KEPT IN SEALED PLASTIC BAGS OR JARS FOR AT LEAST A YEAR WITHOUT REFRIGERATION. TO CARRY JERKY ON LONG BACK-PACK TRIPS, PLACE THE PLASTIC BAGS INSIDE CLOTH BAGS TO PROTECT THE PLASTIC FROM TEARS.

THE FIRST LIGHTWEIGHT CAMPING OR "TRAVELING" FOOD WAS THE INDIAN PEMMICKAN, AND IS AS VALUABLE AND EASY TO MAKE TODAY AS IT WAS THEN. THE ORIGINAL PEMMICKAN WAS MADE FROM BUFFALO, ELK OR VENISON JERKY AND WHATEVER ELSE HAPPENED TO BE HANDY. THIS INCLUDED ALMOST ALL KINDS OF BERRIES AND NUTS AND HONEY IF IT WAS AVAILABLE.

A NOTE TO ALL YOU VEGETARIAN MOTHERFUCKERS OUT THERE—JUST USE BOILED TOFU INSTEAD OF BEEF FOR YUMMY PEMMICKAN. —EP.

RECIPE FOR MODERN PEMMICKAN	
DRIED BEEF	8 oz.
Raisins	8 oz.
Unroasted Peanuts or Pecans	8 oz.
Honey	2 Tbsp.
Peanut Butter	4 Tbsp.
Cayenne Pepper	3/4 Tbsp.

CUT ALL FAT FROM BEEF, THEN CUT INTO THIN SLICES. DRY IN OVEN WITH DOOR OPEN AT LOWEST TEMPERATURE AND DOOR OPEN SLIGHTLY UNTIL MEAT WILL BREAK AND CRUMBLE.

POUND MEAT INTO POWDER OR GRIND USING AN ELECTRIC BLENDER.

ADD RAISING, DRIED BLUE-BERRIES, CHOPPED DRIED APRICOTS, PEACHES, PECANS, PEANUTS.

HEAT HONEY AND PEANUT BUTTER TO SOFTEN IT, THEN BLEND INTO THE MIXTURE. ADD THE CAJENNE PEPPER AND MAKE SURE IT IS WORKED THOROUGHLY THROUGH THE MIXTURE.

IF YOU WANT TO GO COMPLETELY NATURAL, PACK THE MIXTURE INTO SAUSAGE CASINGS (AVAILABLE AT MOST GROCERIES) OR YOU CAN PUT THE MIXTURE INTO PLASTIC "TIE BAGS."

KEEP IN A COOL, DRY PLACE. PEMMICKAN WILL KEEP INDEFINITELY AND CAN'T BE BEAT AS A SNACK OR LUNCHEON ON THE TRAIL.

©1972 UNIVERSAL PRESS SYNDICATE

Mark Gregory

TODAY'S SEARCH FOR HEALTHFUL, NATURAL FOODS HAS PUT A NEW FOCUS ON YOGURT, ONE OF THE OLDEST NATURAL FOODS. IF YOU HAVEN'T TRIED YOGURT YET, NOW'S THE TIME. THIS HEALTHFUL AND DELIGHTFUL FOOD IS NOT ONLY EASY TO MAKE AT HOME--IT'S VERY ECONOMICAL.

TO GROW YOUR OWN YOGURT, YOU WILL NEED A STARTER MIX AVAILABLE FROM NATURAL FOOD STORES. YOGURT IS JUST LIKE SOURDOUGH BREAD IN THAT YOU MUST KEEP A BIT OF IT TO USE AS A STARTER TO PERPETUATE YOUR CULTURE AND KEEP IT GOING.

IT'S EASY TO MAKE YOUR OWN YOGURT IF YOU FOLLOW THESE SIMPLE STEPS:

1. HEAT ONE QUART OF FRESH MILK. (THE MILK SHOULD BE WARMED BUT NOT ALLOWED TO BOIL.)

2. ALLOW THE MILK TO COOL TO LUKEWARM TEMPERATURE.

3. PLACE ONE TABLESPOON OF YOGURT STARTER-MIX IN THE BOTTOM OF A COUPLE OF MEDIUM-SIZE (pint) JARS. THE JARS MUST FIRST BE STERILIZED IN BOILING WATER, THEN ALLOWED TO DRY THOROUGHLY. THEY SHOULD HAVE TIGHT-SEALING LIDS.

© 1972 Universal Press Syndicate

4. SLOWLY POUR THE HEATED MILK INTO THE JAR.

5. PLACE THE LIDS ON THE JARS AND CLOSE THEM TIGHTLY. PLACE THE JARS IN A WARM SPOT WITH CONSTANT TEMPERATURE, SUCH AS IN FRONT OF A HEAT REGISTER. OR YOU CAN PLACE THE JARS IN A LARGE KETTLE, POUR IN WARM WATER AND KEEP CHANGING IT TO KEEP A FAIRLY CONSTANT TEMPERATURE. YOGURT IS READY WHEN THE LIQUID HAS CONGEALED--ABOUT 4 TO 6 HOURS.

THE YOGURT IS THEN KEPT REFRIGERATED FOR USE. IT WILL THICKEN AND CONGEAL A BIT WHEN COOLED.

If you really get into YOGURT...

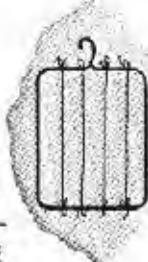

YOU'LL WANT TO BUY A CULTURIZING UNIT. THIS LITTLE DEVICE HAS AN ELECTRICALLY HEATED BASE ON WHICH SITS PYREX GLASS CONTAINERS, AND MAKES KEEPING THE CULTURE A CONSTANT TEMPERATURE A SNAP.

Make Hand-Dipped Candles

THE SAME WAY YOUR GREAT GRANDMOTHER DID. IT'S EASY!

1. MAKE A DIPPING FRAME FROM A COAT HANGER. TIE SOFT COTTON TWINE TO FRAME.

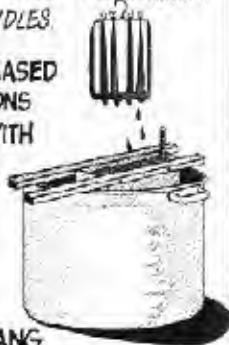

2. WAX MUST BE MELTED IN A DOUBLE-BOILER ARRANGEMENT. USE A DISCARDED ANTI-FREEZE CAN SUSPENDED IN A HOME-CANNER...

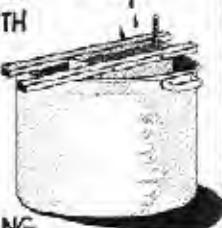

*NEVER MELT WAX OVER
AN OPEN FLAME!*

IMPORTANT--ALWAYS TAKE THE UTMOST CARE IN HANDLING CANDLES.

3. BREAK PARAFFIN OR PURCHASED WAX INTO CAN. ADD CRAYONS FOR COLORING. FILL CANNER WITH WATER, HEAT WAX TO 175° F. USE A CANDY THERMOMETER TO CHECK TEMPERATURE.

4. DIP THE DIPPING FRAME DOWN INTO THE WAX, THEN HANG IN A COOL SPOT FOR 5 MINUTES.

5. AFTER THE FIRST 10 DIPS EVERY OTHER DIP SHOULD BE A HALF DIP. 30 DIPS PRODUCES A CANDLE.

6. CLIP CANDLES FROM BOTTOM OF FRAME AND ALLOW TO HANG FOR A COUPLE OF DAYS.

MEAN ASTARE 1978.

ВСЕРУССКИЙ АРХИВЪ. 181

In our past "advice" we have outlined certain improvised weapons which could be used for self-defense. While those may work OK against street thugs, barroom drunks, and potential date rapists; the best defense for an armed intruder coming into your home is a gun. However, not all guns are created equal- some are so good they you could drop it in a quicksand pit and it'll still fire without stoppage (for example the W. German HK91 assault rifle) to without stoppage (for example the W. German HK91 assault rifle) to the point that you'd never tell using a baseball bat and bad leverage (for example the U.S. made Davis .22 pocket pistol). But do you have a spare \$2,000 for an HK91? We didn't think so. So we listed ours tested or owned by yours truly which are both of good quality and affordable (so even low life bums like us can pack a decent nicee that won't blow up in our faces). Some gun snobs out there like that first gun we met with the Beretta 92F nine mm in the room or that rich Sonso tank in Tucson with his burmudo sniper rifle may not like our choices but FUCK YOU. Give me money than maybe we can be as cool as you are!

that fool you. This rifle has a proven reliability for almost 40 years. It is also a proven killer (the man who shot at the White House and the psycho responsible for the recent Bronx massacre both used SKS's in these incidents). Since the situation can be importuned arms, supplies of the SKS have been drying up. So if you don't have one you better get one damned quick!!

~~You've~~ set one of these.

and would 99% be

SKS RIFLE MODEL 56- Our personal favorite! A 10-shot fixed magazine semi-automatic assault rifle. First utilized by Russians before using the AK-47. It also uses the same caliber, the 7.62x39mm (the 7.62mm NATO) cartridge. We've seen these priced anywhere from \$100 to \$140, but don't let

he has a proven reliability for almost 40
years killer (the dude WHO shot at the White
House for the recent Bremen massacre
incident). Since the Clinton gun or
of the S&W have been drying up, so if you
get one, nabbed quick!

MARIA SEMI-AUTO RIFLE (another winner)
A Chinese sporting version of the AK rifle.
It's barrel is shorter the SKS but a de-
tachable magazine. Also it's about 100
more in price, and on the civilian crime
list. With a 20-round mag you have two extra

How to Annoy Your Local Terrorist

RUSSIAN MAKAROV/ NORTHCORE TOWARD/ 9M- 52- Thanks to the breakup of the Soviet Union/ Warsaw Pact countries like these had been flooding the market. At the top of our list is the Makarov semi-auto handgun available in 9x18 mm or .380 caliber with a magazine capacity of ten rounds. I think it was the official pistol of the Soviet police as well. The Chinese-made Tokarev model uses a 9x19 Parabellum caliber but it is on the anti-gunner ban list - so you better get 'em while there hot. Last but not least- is the Czech CZ 75 pistol in 7.62x25mm caliber with a 5 round magazine capacity. All of these fine handguns could be brought for \$150-\$200, show around for the best deal.

COLT .380 ACP BANTAM- A typical cheap american made semi-automatic handgun. It uses a seven shot magazine in the .380 acp caliber. The usual going price for these are anywhere from \$100 to \$200 depending upon where you get it (gun shop or street corner). To them as good as the models above but it's known as the 'lucky nine' on the streets and every 15-15 year gangster kid seems to it. CONTACT MR KRI

BRITISH LEE MK III b. L. This bolt action deer rifle was fought in World War One. It uses a .303 caliber fed from a ten round fixed magazine. Also it's very powerful, and has quite a recoil. Many surplus rifles in good to very good condition can found VERY cheap (around \$50- \$120). While most of them rifles are a good buy many tend to be old as well. It's suggested to have one examined by a gunsmith before using it for defensive purposes.

WAR BETWEEN MEN AND MACHINES GOVERNMENT run by multi-national corporations. Science run amok, accompanied by global ecological destruction.

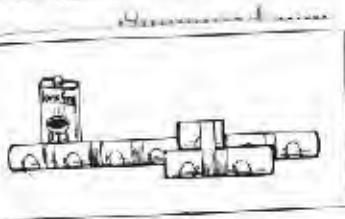

KILLING TIME

Metal Knuckle Device

This crude device is shaped like a hand. Two solid steel blades are bent at the opposite direction from the original fingers. The handle is very long in a "D" shape and clasped over the hand, serving as a leather handle for knuckle dusters.

Beer Can Mortar

Homemade mortars devices constructed from a can of beer cans (taped) and sand have been encountered in Canada. The device is constructed so that the total length is about forty-eight inches. With a series of holes in the base can.

A propellant such as charcoal lighter or gasoline is placed in the bottom of the device. The device is then shaken, and lit, and an explosion takes place, hurling a flame from the end of the device that reaches about twelve feet. Projectiles such as old batteries, glass and barbed wire may also be discharged from the device. The principle employed apparently was first used by the Vietnamese in Vietnam.

ARCHERY IS A FUN SPORT THAT CAN BE ENJOYED BY EVERYONE, OLD, YOUNG, BIG OR SMALL, AND IS A GREAT EXCUSE FOR 'GETTIN' OUTDOORS.'

THERE ARE FOUR BASIC KINDS OF ARCHERY, WITH PLENTY OF ACTION FOR ALL: FIELD ARCHERY, TARGET ARCHERY, BOWHUNTING AND BOWFISHING.

ARCHERY IS A RELATIVELY INEXPENSIVE HOBBY, BUT YOU MUST HAVE EQUIPMENT FITTED TO YOU. BETTER SPORTING GOODS SHOPS CAN HELP IN SELECTING PROPER EQUIPMENT.

To Shoot:

1. STAND RELAXED AND WITH YOUR FEET POINTED AT AN ANGLE AWAY FROM THE TARGET. THE MIDDLE SHOULDER IS LEFT HANDED.
2. FACE THE LEFT SHOULDER TOWARDS THE TARGET (MAN, WOMAN).
3. GRASP THE BOW IN A FIRM BUT RELAXED GRIP.
4. PLACE THE ARROW ON THE STRING, POSITIONING IT WITH THE ANCHOR HOOKING POINT OUTWARDS.
5. GRASP THE STRING WITH THE FIRST THREE FINGERS OF THE RIGHT HAND. THE TWO LOWER FINGERS ARE UNDER THE ARROW, THE TOP FINGER ABOVE THE ARROW.
6. DRAW THE ARROW BY PUSHING WITH THE LEFT ARM AND PULLING WITH THE RIGHT ARM, HOLDING THE ARROW LIGHTLY BETWEEN THE FINGERS AS YOU PULL THE STRING.
7. AT FULL DRAW, THE ARCHER'S RIGHT HAND RESTS AT HIS "ANCHOR POINT," A SPOT LOCATED ON THE RIGHT SIDE OF HIS FACE OR CHIN, TO WHICH THE ARCHER BRINGS HIS HAND TO TOUCH BEFORE RELEASING THE ARROW.
8. WITH THE ARROW POINTING AT THE TARGET, IN WHICH THE SAME WAY AS YOU WOULD POINT YOUR FINGER, THE THREE FINGERS RELEASE THE STRING. THE ARCHER SHOULD "FOLLOW THROUGH" WITH THE PELL AND RELEASE IN A SMOOTH MOTION.

NOTICE:

Barney isn't real, he doesn't know you're alive! Dinosaurs and people were never alive together, and if they were, Barney'd be eating your intestines while you watched. Other than that, enjoy!

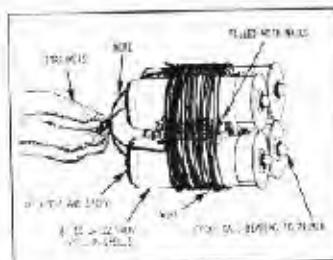

Bacteria (30,000x)

Blade Glove

The glove pictured is for an infantry glove. Attached to the four fingers of the glove are folding, nail-like blades approximately four to five inches in length. The blades are held by links to pieces of electrical cord that are then attached to the fingers of the glove via clamps and plastic tape. The thumb has been omitted in the glove.

By folding the fingers into a fist form, the blades can be concealed behind the wrist and the glove appears to be for use in clandestine motorcycle riding. In usage it is

Shotgun Shell Bomb

A bomb can be constructed by wrapping four shotgun shells together and fill in the void areas with #8 shot. It is then strapped to the bomb so that it hangs on the primer and of the shell. A small ball bearing attached to the primer acts as an impact source to discharge the shells. Upon detonation, the mass is used in all directions.

ARCHERY SAFETY RULES:

1. NEVER SHOOT AN ARROW STRAIGHT AT YOURSELF OR ANYONE ELSE.
2. NEVER LOAD A BOW UNLESS YOU ARE SURE OF YOUR TARGET.
3. NEVER POINT YOUR BOW AT ANYTHING YOU DON'T WANT TO SHOOT.
4. Check your equipment periodically and repair them carefully.
5. Make sure your equipment is in good shape.

Mark Hargan

U.S./WORLD NEWS

LITTLE ROCK, Ark. — A man arrested on a biological weapons charge for having a lethal extract of the castor bean plant committed suicide yesterday in his jail cell.

Thomas Lewis Levy, arrested Thursday at his rural Arkansas farm, was charged under the federal Biological Weapons Anti-Terrorist Act of 1989 and faced life in prison if convicted. The FBI lists ricin as third in toxicity behind only plutonium and the botulinum toxin. It has no known antidote.

17. **Family Affairs**

OUR FIRM WOULD TWO LIES SAY DONT.

SAY FOR THE CHILDREN AGAIN

"This guarantee lets
parents relax."

More numbers up there in Washington (especially the Republican party) have been talking a lot about family values lately. Do they really value 'the family' as a whole? Well, of course they do but not for the reasons most people consider. So - I don't care if they get all choked up and tear eyed when they see children but they do love kids. Politicians bring the deepest twisted visionaries they are too many things in children. They see an empty nest for starters to pour their shysters of half-baked truths and outright lies into to cook to perfection. Interestingly - so rancid and raw is this stew that it takes twelve years to cook! They even have a funny name for it - 'schmaltz'! They see a calf which in eighteen years time will turn into a sheep to be sheared every year (around April) but of their money instead of wool. They call this income tax. They see a kid (ironically) which again in eighteen years time will become a goat - all ready to eat the garbage of society for the next forty odd years give/take a decade. You see after feeding all those kids spectators in 'school' they're now ready for the main course (heh heh)! They see miles to tend the fields of the nation and that society has created. After about forty or fifty years those miles would've really made asses out of themselves. If you're a boy - they see a pig who can be herded into farms to be trained to kill other farm animals barking and squealing at them in wartime. If your a girl - they see a rabbit (lucky you). A rabbit whom if she's pretty enough to meet a young buck she can make little bunnies for the nation to turn into empty sets, sheep, goats, angles, pigs, and rabbits to keep the old machine running smoothly. Think about this the next time a politician wants to kiss your baby!!

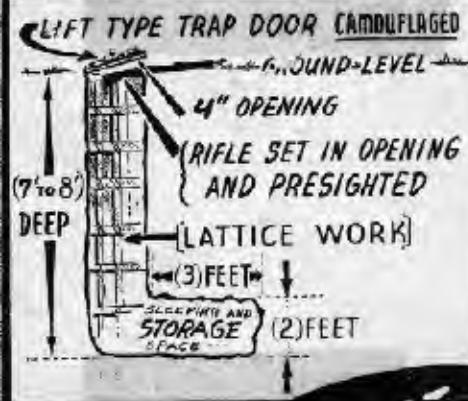

NOW MIGHT BE A GOOD TIME
TO BRING UP A DELICATE SUBJECT.
DRINKING.

"Go out in Brooklyn any night of the week," the commissioner challenged the judges. "All these characters out there on the corner, drinking, urinating. Once they get a few drinks under the belt, out come the knives, out come the guns, out come the loud mouths."

SUSPENSIONS
The following offenses can cause your immediate suspension from school:

1. Use and/or possession of drugs ✓

POTTER'S JUNKYARD DEPT.

JUNKYARD GENERATORS

Most households today are dependent on some form of electricity from the power company. But in times of disaster (natural or man-made) power outages are common, you would have to live by lantern or candle light, buy an expensive generator, or learn to live in the dark. However, this need not be the case; you can make a 12 volt powerplant from a 12 HP lawnmower motor, a permanent magnet, and a 12 volt marine/31 deep cycle battery using the diagram presented below. Most parts can be scavenged from the junkyards or bought cheaply through auto supply stores.

Another power generating system which would be useful in an emergency situation is a hand cranked generator. If it built using a phone magnet (like in surplus WW2 military telephones), using a transformer, and four diodes. The diagram for it is shown below.

How To Avoid Seeing Red.

KITCHEN CHEMISTRY DEPT.

CHILL FORMULAS

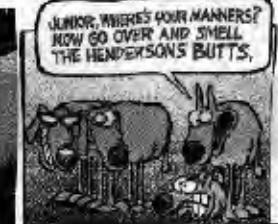

AMMONIUM SOAPS: Dissolve 2 cups of steer's fat into 1/2 quart of alcohol in one container. Then dissolve 1 tbsp. of caustic soda (lye) into 1/2 quart of alcohol in another container. Warm dermatene x to 140° F and mix the two containers together. Pour this mixture into cans and cool. Stores solid fuel in airtight containers.

Blue: Boil mix of 35% resin from spruce, balsam fir, or pine tree and 15% bacon fat or boil the heads, fins, and tails of several fish until only the sticky shit remains.

Uninvited Guests—Mosquitoes

With everything finally set for the family barbecue, another problem arises—mosquitoes! Without insect repellent, your family may finally give up any attempt to eat outdoors. Fortunately, a simple chemical recipe can provide a workable solution. Mix 10 gm of camphor and 10 gm of calcium chloride in 200 ml of ethanol.

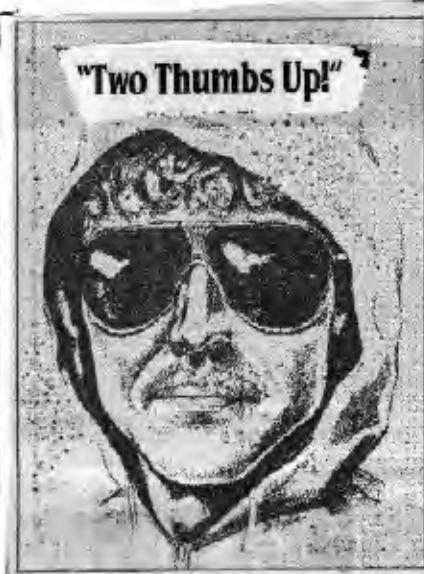

JUNIOR, WHERE'S YOUR MANNERS?

NON-VIOLENT RESISTANCE

Modern Warfare Is a Brutal Form of Hunting

LONG LIVE THE UNBOMBER!!

(talk about one hell of a press release) has the man more baffled than ever. They don't know whether to take it seriously or see it as a red herring. New theories I'm sure abounds every day. One interesting new theory is that the Unbomber isn't motivated by political reasons at all but is driven by a need arising from sexual inadequacy. I mean... come on, guys that means he loves killing certain people's babies and cheats with shrill because he can't get laid (Hahaha)! I'm sorry but that one sounds like a load of bull to me. Users like that (for example Ted Bundy, Richard Ramirez, Henry Lee Lucas, ad nauseam) tended to hunt down innocent girls and women not corporate executives, rich seniors, and the like. Another thought-provoking theory suggests that the unbomber is or may have been connected to an ex-60's type radical who preached violence to effect social change. Although, this character's name evades me at the moment (I didn't save the newspaper article)- the writing style of this guy's writings and that in the unbomber's manifesto is very similar. In addition, to this day this individual is still at large after being captured by the feds over a decade and escaping about some odd twenty plus years ago. Now this theory tends to be more logical and consistent with the unbomber's profile. If he strikes again this year it would be fun to see who he targets for beatification this time, which wretched soul he chooses to blow to smithereens! Root us the good work Unbomber and have an explosive new year unbomber!!!

NEW AND IMPROVED C-4
Better-Than-Easy Recipes for Making Money and Double the Fun
By Jennifer Krebs

This book is the all-new version of the only non-Homemade C-4 book written to teach you alternatives for making the most of your C-4. It includes a quick guide to safety, instructions for making explosives, and a glossary of chemicals and how to assort them. It also includes many words, definitions, and a glossary of chemicals and how to assort them. It also includes many words, definitions, and a glossary of chemicals and how to assort them.

FMX

THE REVISED BLACK BOOK
A Guide to Field Manufacturing

by William Wallace

Here is a sensible, modern guide to making 45 different explosives in standard home workshop equipment. Includes safety guidelines, step-by-step programs, a glossary of explosive components, definitions of terms, a useful glossary, and more. For academic study only. 8 1/2 x 8 1/2, 128 pages, 162 pp.

POOR MAN'S TNT
Improvised Gunpowder

by Dennis Taylor

Contains a poor man's TNT's is hand-made and explosive, explosive you can make it requires only three basic items and legal materials and is used only for amusement or hunting. An gunpowder can be improvised in seconds. As the first poison explosive gunpowder also has nitro-glycerine, explosives are dangerous so this is by SC27- and only 5 1/2 x 7 1/2, volume 46pp.

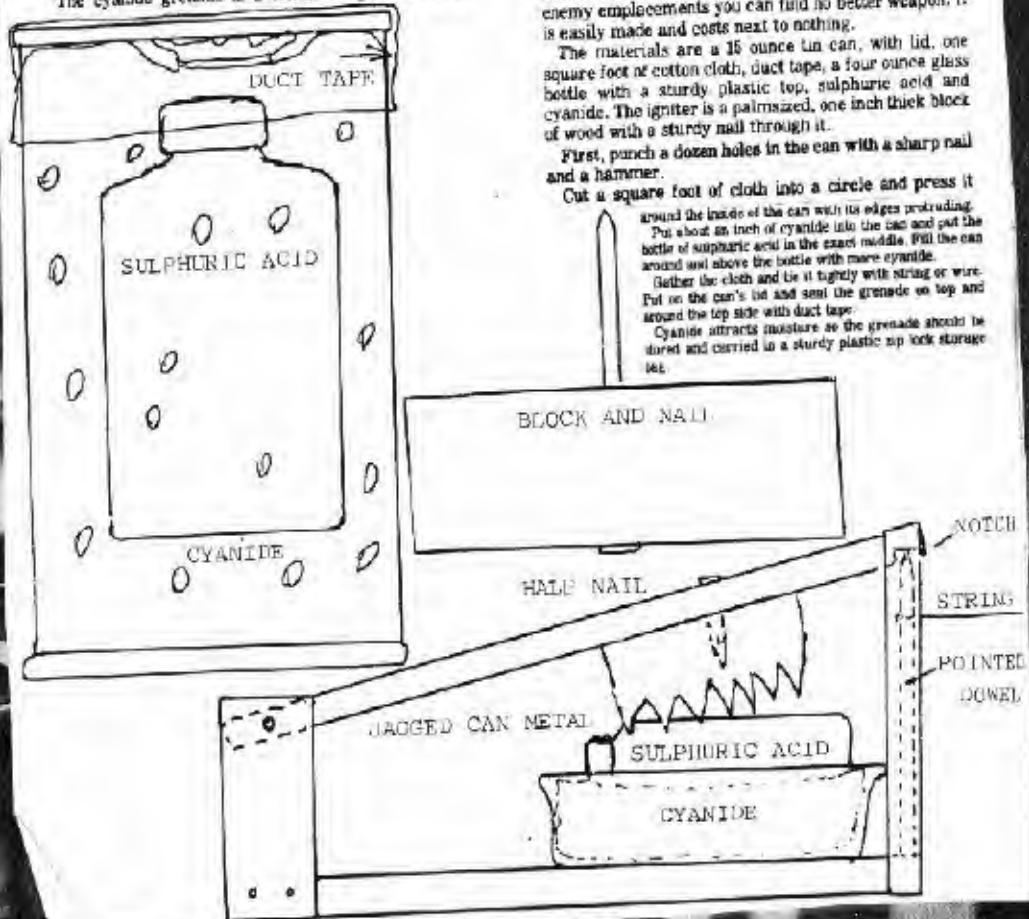

Good Clean Fun.

CHOKING VICTIM DEPT.

CYANIDE GRENADES

By KURT SAXON

The cyanide grenade is a wonderful grenade. It is

To use, remove from the bag and insert the nail into one of the holes near the middle of the bottle. Give the block a sharp smash with your palm to break the bottle and then fire it into the tomb of your choice.

To booby trap your home is easy. All you need is some wood, sulphuric acid, cyanide, dowel, inner tube rubber band and a plastic butter dish.

For the base, use a one foot long by one inch thick by three inches wide piece of wood. At one end, nail on two pieces of wood which have been drilled to hold a thin dowel. Drill a similar sized hole through the side of one end of another one inch strip of wood. Saw a piece out of the other end to form a notch.

Cut a large nail in half, sharpen it and bang it into the middle of the board about one-third of the way into the notched end.

Cut up a tin can and bend it so there is about an inch on one side of the bend and three inches on the other. Cut two three inch strips of this and cut a three saw edge on each. Glue or tape the jagged strips about three inches apart on opposite sides of the nail.

Put a string rubber band cut from an inner tube around the ends of both boards. Stretch it tightly and prop it up with a dowel positioned at the top end. Tie a string to the dowel and stretch it to a door knob or across a corridor or hall where an intruder would be bound to walk into it.

much better than the fragmentation grenade as it is not noisy. Nor does it destroy property or cause closed casket funerals.

A modification of it is an excellent protector for the home when you are away. For cleaning out fox holes or enemy emplacements you can find no better weapon. It is easily made and costs next to nothing.

The materials are a 15 ounce tin can, with lid, one square foot of cotton cloth, duct tape, a four ounce glass bottle with a sturdy plastic top, sulphuric acid and cyanide. The igniter is a palmized, one inch thick block of wood with a sturdy nail through it.

First, punch a dozen holes in the can with a sharp nail and a hammer.

Cut a square foot of cloth into a circle and press it

around the inside of the can with its edges protruding.

Put about an inch of cyanide into the can and put the bottle of sulphuric acid in the exact middle. Fill the can around and above the bottle with more cyanide.

Gather the cloth and tie it tightly with string or wire. Put on the can's lid and seal the grenade on top and around the top side with duct tape.

Cyanide attracts moisture so the grenade should be stored and carried in a sturdy plastic zip lock storage bag.

Before leaving your home or office, put a plastic butter dish or like container under the nail. Put a plastic bag with several ounces of cyanide in the dish. Next, put a four ounce bottle of sulphuric acid on the cyanide under the nail.

When an intruder comes in contact with the string, the nail will be pulled out and the board will slam down. The nail will break the bottle and the jagged nail will shred the plastic bag. The acid will eat the cyanide and in seconds the area will be filled with deadly gas.

The gas dissipates in a couple of hours. Ideally, you should place the trap so you can at least see the trap string when you open the door. If it isn't taut you should hold your breath and go in and open some windows and get out before breathing. At the same time, turn on a fan or air conditioner if you have one.

Shut the door and return in a couple of hours. By then, it should be safe, even if it happened only shortly before you returned.

Go back in and examine the body. Take any money or valuables for your trouble. Diamonds and hide the traps. Open and rummage through some drawers to make the place look like a burglary was in progress.

Call the police and tell them a burglar got in and died of a heart attack or something. There is little chance a thorough autopsy would be conducted and even so, you were out and he had no business there and what could they prove? If it is night and there are no witnesses available you can dump the vermin in the nearest alley and forget it.

THE ULTIMATE WEAPON IN GERM WARFARE

BACTERIA

Bottleneck Envelope

Biology. Professor Jacob Segal has suggested,⁵⁷ that AIDS does not originate from African Green monkeys at all, but was "engineered" from two separate viruses at America's secret biological weapons centre in Fort Detrick.⁵⁸ He argues that scientists injected the new virus into prisoners during the mid-1970s in return for their freedom, but were unaware of the mid-nature of their terrible creation.

BOTULISM Botulism poisoning usually occurs when improperly home-canned non-acid foods or meats are eaten without thorough boiling. The rod-like bacterial cells, stain-producing rods and free spores are shown on the right.

Jar in a dark, moderately warm area for ten days. At the end of this period, you should notice a bloat to the lid of the jar and small amounts of a brownish mold. These are the cultures of *Clostridium botulinum*, which produce the botulinus exotoxin, also known as botulism, as a by-product of digestion.

As this can be a hit-and-miss method, use two

Made Easy

NEW MEXICO STATE POLICE

INTERVIEW CONDUCTED IN WITNESS

The security devices common in urban areas such as deadbolt locks, gates, razor wire, barricades, etc. are usually adequate for keeping out riff raff but not determined intruders. Short of using packs of pitbulls or your own private armed guard you need devices that'll create sausages! The devices shown below can be cheaply made and require no technical expertise to employ.

The Cut-Off- One my favorite personally! A 12 gauge shell is placed in a metal sleeve attached to a piece of wood with a nail in it in a way that the shell extends slightly above the sleeve. It's pressure activated gun can be placed on stairs, doors, or scattered in yards.

1) Get bulb- Turn off light, remove it from socket, and drill a small hole in upper neck of bulb. Fill bulb with gasoline and plug hole with electrical tape. **WARNING**- This is important! Make sure light switch is off!!! Then screw bulb back in. Any one turning on the light will get an explosive surprise.

Alimony

A Better Mousetrap

Rat Trap

Thirty-two miles inland from the port mentioned above were found, surrounding a limestone patch in Hilo bay, the device, constructed from an ordinary rat trap. They 22 may be described as follows: At the head of the rat trap a hole is drilled and a piece of copper tubing one quarter of an inch in diameter and two inches in length is inserted from the back. A washer is placed on the face of the trap at the base of this tubing to prevent its being non-detachable from the tubing. The front of the trap is closed with wire to prevent cheating. The release mechanism is built so there is a full catch of the spring when set and is the common type for traps.

The trap is then sprung in the front end of the box or a leg account because it over the ground only the green painted tubing which protrudes in the direction of the pathway can pass. A green cord attached to the trap's release mechanism is stretched across the top bar. When a person walks on the path way, he trips over the cord, thus releasing the mechanism and activating the trap.

These warrants exist and are ready for Big Brother's use when the occasion arises. So if you have ever had doubts about whether a bideout would be a worthwhile investment, these two master warrants should dispel them.

PARAGLIDE SURVEY DATA SETS

THE 5 STAR CERTIFIED COMMERCIAL LENDER AWARD

- 1) "NO W.R. RPT! Always assume the enemy's listening!"
- 2) Never answer calls from any outsiders. Talk only to one another in your group and completely ignore everyone else.
- 3) Never use real names of persons, use only unit callsigns and codenames.
- 4) Use authentication codes if you have any doubt about someone on your channel. Agree upon a codeword in advance and add them any two sequential letters of that word. They respond first with the next two letters. For example, if "COKE" is the codeword and you gave the suspect station "KFCP"; the proper response would be "KFC". If they respond wrong, order a channel and take charge at once.
- 5) If your channel suddenly gets activity- have a pre-arranged backup channel selected.
- 6) Keep transmissions brief, under 15 seconds if possible.
- 7) Change channels, callsigns, codes, and authentication codes daily! Do not answer calls from anyone using yesterday's codes!
- 8) Give all locations by map referenced codes or brevity codes.
- 9) Give all numbers by letter substitutes.
- 10) Use of high-powered IR radios (5 watts+) isn't recommended because of the radio interference it creates plus it heightens possibility of FCC attention.

SIMPLY AND DIRECT METHOD OF TAPPING RADIO

You will need an older crystal type CB radio for this one. Try to get one with at least 25 channels. Now the first thing you have to do is go to a hobby shop and buy transmit and receive crystals for radio controlled cars/planes. They run from channels 4 through 14, buy all five channel crystals. Then you want to open up the CB radio to where the crystals are located. Change the transmit/receive crystals in the way shown in the table below.

Remove Ch.	Replace with Ch.
4 - 27.000 MHz	4 - 27.005 MHz
7 - 27.025 MHz	7 - 27.015 MHz
12 - 27.105 MHz	12 - 27.095 MHz
16 - 27.145 MHz	16 - 27.135 MHz
21 - 27.205 MHz	21 - 27.195 MHz

Now instead of the CB transmitting on the regular band it's transmitting on the radio control band used for model planes and garage doors. Please listen to this so its pretty safe just be careful about using it around remote controlled planes and the like.

BANANA BREAD

(Serves 2)

4 Laughing Eyes	2 Milk Containers
4 Loving Arms	1 Fur-lined Mixing Bowl
2 Well-shaped Legs	1 Banana and 2 Nuts

Method: Looking into laughing eyes, spread well-shaped legs slowly. Squeeze and massage milk containers very gently, until fur-lined mixing bowl is well greased. Check frequently with middle finger. Add banana and gently work in and out until well creamed. Cover with nuts and sigh with relief. Bread is done when banana becomes soft. Be sure to wash mixing utensils, and don't lick the bowl.
Note: If bread rises, leave town.

10 WAYS TO HATE THE TINI MAX

- 1) Glue broken pieces or busted batteries behind a circuit board.
- 2) Glue the tiny chip onto someone's tank and seal it forever.
- 3) Place dead batteries inside compartments of electronicized (will be alarm, timer, remote controls, etc.)
- 4) Glue lightbulbs inside car buckets and break them often.
- 5) Insert a couple of drops of epoxy to the barrels of guns. Gluing chips in auto pistols works good too.
- 6) In Army to cover tools by gluing .50 cal. bits up knifes, nail clippers in hallways and drill drivers in rooms.
- 7) Glue razor blades to the wire part of a coathanger then place it in a car or back such where units go into.
- 8) Glue the chain of bicycle onto the chainwheel and/or gear(s) out.
- 9) Glue electric plugs into their sockets.
- 10) Glue phone plugs inside water faucets.
- 11) Put caps on liquor and pre-scription medicine bottles.
- 12) Nine more (at the risk of insulting our reader's intelligence we list this one. Use your fucking imagination!)

REVENGE

Regina Barreca, author of *Sweet Revenge: The Wicked Delights of Getting Even* (Harmony Books), is a walking repository of revenge tales. Take the airline reservations agent left to cope with a verbally abusive passenger. "She kept her cool throughout his long harangue," recalls Barreca, "then sent his luggage to Tokyo. He was going to Tennessee!" And there was the woman whose husband left her for a 19-year-old. "Every day for weeks she went to his office parking lot and removed the license plate from his car. He had to spend days at the motor vehicle bureau." Wanting revenge is perfectly normal, says Barreca.

Thus the Lord created man, all the parts of His body argued, never who was to be the Jesus. The brain insisted that since he controlled all parts of the body, he should be Jesus. The legs argued that since they took him wherever he went, they should be Jesus. The stomach countered with the explanation that since he digested all the food, he should be Jesus. The heart argued that since they would be doing all the work, they should surely be Jesus. The eyes said that without them, man could be helpless. So they should be Jesus. Finally, the feet voted against the position of Jesus. All of the great parts of the body laughed so hard that the private parts joined and closed himself up. After a few days, of this, the brain became angry, the legs quivered violently till the hands were so紧 they hung at the side of the body, and the eyes became teary and unable to see. They all relented and made the asshole kiss. Let's please, just you don't have to be a saint to be holy, just be asshole.

117 MILITARY STYLE RATIONS

A while back we got out in some testosterone masaines such as Soldier of Fortune & couple of ads for military rations. It sounded cool at first being the larry outdoors type that hate to cook and can't wait to eat until we noticed the fucking prices. Since they were sold in cases we did some arithmetic and we found out to our horror on the average it could cost \$6 per meal! That's an awful lot of money to eat out of a couple foil pouches. So we figured out how to do it at half to a third the cost, by making our own. Each meal had a main dish, a side dish, a junk food dish (desert), a drink mix, and condiments. With our system meals can be customized according to individual tastes and their availability at your local store. We suggest going to the supermarket rather than your local marts (or bridges as we call them here) to come out cheaper. Here are some suggestions to get you started off.

MAT DISHES- Keep your eyes here as the shelves are probably full of these. The best bet is the brano hormel which makes nice small (8 oz.) cans of just everything like baked beans, beans and franks, lasagna, noodles and chicken, au gratin potatoes, etc., mac, oven tomato. Also look out for those cans of chunky soups and the ever favorite varieties of pasta like spaghetti, ravioli, and mac n' cheese.

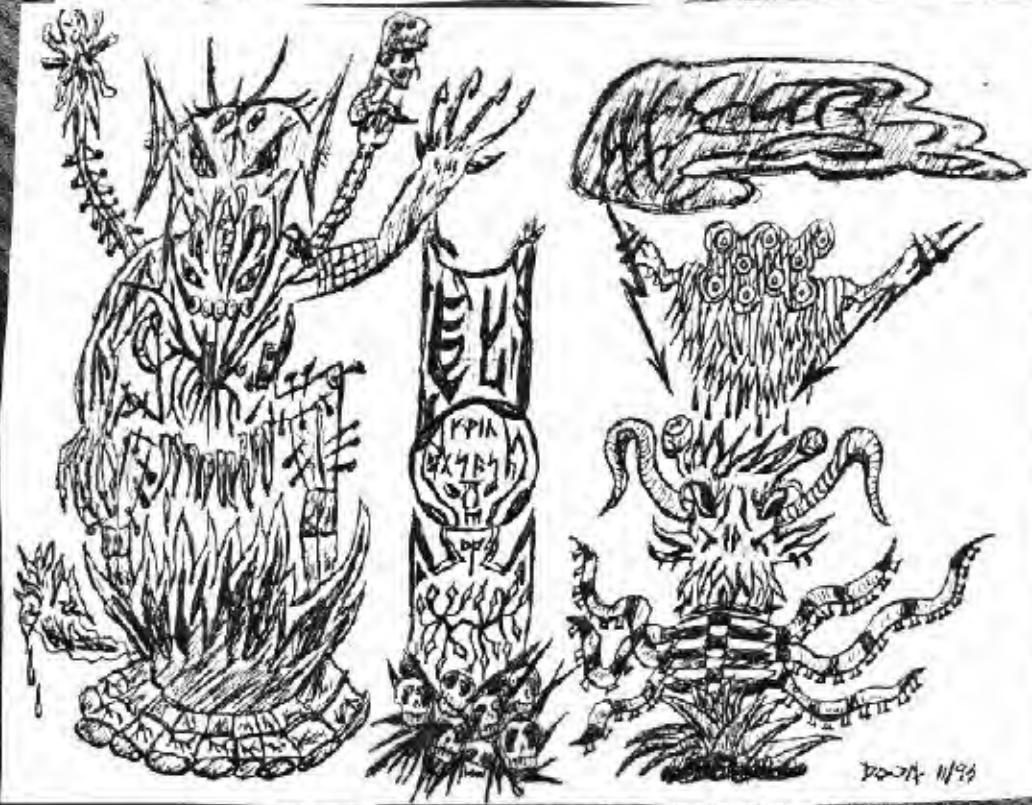

STIR DISHES- The small fruit cans from Del Monte or applesauce make great dishes.

DESSERT- The little tubs like oatmeal cookies, brownies, honey buns, or those little cups of pudding make great desserts.

CONDIMENTS- Besides the usual packets of salt and pepper the sky's the limit. Use soy sauce or hot mustard for chinese food flavor, ketchup from fast food joints, taco bell salsa, or ramen flavor packets.

DRINK LINE- This could be water, tea, tea mix, instant coffee, or beer.

For all that's necessary is to bag each item into a ziploc bag. Say one meal per bag. That's it. Bon appetit!

Have you ever ~~HAD SOMEONE WATCHING YOU~~ thousands of miles away?

YOU
WILL

In the near future you'll share your bedroom with agents thousands of miles away.

Using payphone, one-way sound and video hook-ups. That will let them stalk loyal citizens like you wherever they share your interests. A netter where they are.
